

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to develop their crane business into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

All through their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into many different global markets and continues to develop contemporary machines to ensure that consumers are able to become safer and more efficient within their workplace.
